The Connecticut Department of Transportation (CTDOT) is undertaking the Walk Bridge Program to replace the deteriorating railroad bridge over the Norwalk River in Norwalk, CT. One of the oldest movable bridges in the country, the Walk Bridge is a critical transportation link on the Northeast Corridor between Washington, D.C., New York City and Boston carrying four tracks of Metro-North Railroad, Amtrak and freight service.

CTDOT is working to inform local residents, commuters and businesses of current and upcoming construction activities through ([www.walkbridgect.com](http://www.walkbridgect.com)). This notice is one in a series of notices that will be issued to keep the public informed throughout construction.
